

TRAFALGAR HIGH SCHOOL

CHILD SAFETY

RISK ASSESSMENT POLICY

Rationale:

Victorian Government schools have an important responsibility for keeping children safe.

Child Safe Standard 6 requires schools to develop, implement, monitor and evaluate risk management strategies to ensure child safety in school environments.

A risk assessment register will help schools comply with Child Safe Standard 6.

The purpose of a child safety risk register is to identify, document, and manage or control child safety risks in the school environment.

Implementation:

Trafalgar High School will adopt the following process for identifying and reducing or removing risks of child abuse;

1. Identify the school's child safety risks across the range of school environments (including excursions, camps, online) using the DET Child Safety Risk Assessment Register template.
2. Identify any existing risk mitigation measures or internal controls.
3. Assess and rate the school's child safety risks given the existing controls in place, taking into account the likelihood of risk, and the likely consequence of the risk.
4. If the risk rating is more than the 'acceptable level', identify further risk management strategies through additional controls or other prevention, detection or mitigation strategies and then re-assess the risk.

The risk management process will be documented, recorded and reviewed periodically. Effective risk management strategies are dynamic and change over time as new risks arise and others may no longer be relevant.

Effective risk management strategies need to be transparent, well understood and diverse, to take account of the increased level of risk associated with the specific nature of some activities and the vulnerability of particular groups.
